

What's New....

- Server infrastructure expansion
- Customer Care website
- Introducing new RFID & Enterprise software
- Customer Case—Skanska Construction

**Exhibiting at
AWRF P.I.E.
October 3rd**

Major Server Upgrade

We've doubled our server infrastructure increasing speed & performance capabilities by over 100%! Also numerous code optimizations to handle massive customer data.

Recent Milestones

- Crosby Quic-Check PRO powered by InfoChip enters fifth year with hundreds of distributor sites on five continents
- 40,000 end-user logins
- 1.5 million active InfoChip RFID tags

New RFID

We debuted our new DuraBand Metal, printable DuraFob and Bluetooth reader at the RFID in Energy conference in Houston. HF and UHF chips now available in a variety of attachments.

Customer Case

InfoChip is proud to support Skanska Construction. Tracking lifting, rigging and fall protection equipment at the World Trade Center construction site.

Did you know?

Two new software products you can extend to your customers are now available.

IC Free lets customers scan assets, view status, schedules, edit locations & scrap. Changes are uploaded to IC Online.

IC RAMSES (RFID Asset Mgt. Shared Enterprise Solution) offers enterprise server, support, preventative maintenance, kits management and system integration modules.

New Customer Care Page

<http://support.infochip.com>

The Customer Central site provides info on the latest version, software updates and breaking news. There is also an FAQ & Knowledge Base to help you with any questions.

Software Enhancements

- New search filter provides more real estate for your search results
- Bulk item update enhanced (active, out-of-service, location, etc.)
- Help offers videos & training manuals.
- InfoChip +News link
